## Overview

The MC-7130-MP marine computer is powered by the latest 3rd generation Intel® Core™ i3 3120ME processor. Optimized for ECDIS, these computers can serve in nearly any bridge role thanks to their comprehensive range of I/O and communications interfaces: eight NMEA 0183 terminals, four serial ports, four gigabit Ethernet ports, six USB 2.0 and three SuperSpeed USB 3.0 ports. The MC-7130-MP is designed to give unrivalled PC performance for a new level of flexibility and control for marine applications.

Designed with the highest quality and durability in mind, the marine-grade MC-7130-MP computer features a rugged chassis and vibration tolerance up to 1G, together providing a highly reliable platform that can easily tolerate the harsh environmental challenges of marine environments. Additionally, the MC-7130-MP's compact size

and low power consumption return a low heat profile that increases MTBF while simplifying integration into existing bridge systems or newly designed marine solutions.

Finally, the MC-7130-MP also offers convenient connectivity expansions via a single PCIe (x16) slot and two universal PCI slots, allowing users to install a variety of peripheral extensions for radar, PROFIBUS, VGA graphics, and more, allowing for direct consolidation of all input sources at a single hub.

The MC-7130-MP platform is optimized for use with the Windows XP Embedded, XP Professional, or Windows 7 operating systems, allowing users to choose the development environment most suitable for the application's needs.
