

Firmware for NPort IA5000A Series (NPort IA5450A Series) Release Notes

Version: v1.6	Build: Build 19032122
Release Date: Mar 31, 2019	

Applicable Products

NPort IA5450A Series

Supported Operating Systems

N/A

New Features

- Supports HTTPS.
- Supports MXview auto-topology function.
- Supports MXconfig.
- Supports SNMPv2c.
- Supports dual IP.
- Supports redundant LAN.

Enhancements

- Accessible IP list can now be used to restrict all device services.
- Complies with Moxa Security Guidelines on the following: Account Authentication Management, Network Service Management, and Audit and Log Management.
- CVE-2017-14028: An attacker may be able to exhaust memory resources by sending a large amount of TCP SYN packets.
- CVE-2017-16715: An attacker may be able to exploit a flaw in the handling of Ethernet frame padding that may allow for information exposure.
- CVE-2017-16719: An attacker may be able to inject packets that could potentially disrupt the availability of the device.
- Remove unnecessary information displayed on the Web, Telnet, and Serial consoles during the login process.
- Remove the TTL limitation (1) on multicast packets.

Bugs Fixed

- Pair connection mode cannot resolve the domain name.
- The password may be exposed in the Moxa service.

Changes

N/A

Notes

N/A

Version: v1.5	Build: Build 18051118
Release Date: Mar 29, 2019	

Applicable Products

NPort IA5450A Series

Supported Operating Systems

N/A

New Features

- New Flash memory because of the end-of-life of the previous one.

Enhancements

N/A

Bugs Fixed

N/A

Changes

N/A

Notes

N/A

Version: v1.4	Build: Build 18051118
Release Date: Nov 10, 2016	

Applicable Products

NPort IA5450A, NPort IA5450AI, NPort IA5450AI-T, NPort IA5450A-T, NPort IA5450A-IEX, NPort IA5450AI-IEX, NPort IA5450AI-T-IEX, NPort IA5450A-T-IEX

Supported Operating Systems

N/A

New Features

- Supports new flash component to deal with component end-of-life.
- Supports new RTC RX8130CE.
- Supports 12-byte serial numbers.

Enhancements

N/A

Bugs Fixed

N/A

Changes

N/A

Notes

N/A

Version: v1.4	Build: Build 16100514
Release Date: N/A	

Applicable Products

NPort IA5450A, NPort IA5450AI, NPort IA5450AI-T, NPort IA5450A-T, NPort IA5450A-IEX, NPort IA5450AI-IEX, NPort IA5450AI-T-IEX, NPort IA5450A-T-IEX

Supported Operating Systems

N/A

New Features

N/A

Enhancements

- Enhanced web login security and supports 5 users logged in simultaneously.
- Extended HTTP challenge ID length from 32 bits to 256 bits.
- IP of NPort can be set to addresses ending with 0 or 255.
- Enabled the default password "moxa".
- Increased CSRF protection mechanism.
- Increased XSS protection mechanism.
- Supports "ARP probe" in RFC5227. NPort would respond to ARP requests with sender IP address 0.0.0.0.

Bugs Fixed

- NPort cannot send email using Google's SMTP server.
- In pair connection mode, master does not pull down RTS/DTR signal after the TCP connection is broken.
- Command port sends lots of "D_ASPP_CMD_ALIVE" packets after running for 50 days.
- NPort may reboot or hang from several buffer overflow attacks through Telnet, SSH, DSCI, SNMP, HTTP, and HTTPS.

Changes

N/A

Notes

N/A

Version: v1.3	Build: Build 15041515
Release Date: N/A	

Applicable Products

NPort IA5450A, NPort IA5450AI, NPort IA5450AI-T, NPort IA5450A-T, NPort IA5450A-IEX, NPort IA5450AI-IEX, NPort IA5450AI-T-IEX, NPort IA5450A-T-IEX

Supported Operating Systems

N/A

New Features

N/A

Enhancements

- Uses model name instead of "NULL" for SNMP object "sysDescr".
- Supports connecting to the server by domain name and the server IP will change dynamically.
- Supports updating the ARP table by gratuitous ARP.
- Supports time synchronization with an NTPv4 server.
- Supports RFC2217 NOTIFY-LINESTATE for Transfer Shift Register Empty and Transfer Holding Register Empty.

Bugs Fixed

- If an SNMP GETNEXT command is issued on an object that does not exist, 'no such name error' is displayed.
- When DHCP renews IPs, if the IP was originally given by a relay agent, NPort should send a DHCP request to the relay agent, not the DHCP server.
- In Real COM mode, when the modem status of the NPort's serial port is changed frequently, the NPort will sometimes fail to notify the change to the driver.
- In reverse telnet mode, the NPort will try to subnegotiate the COM port control options without option negotiation first.
- In RFC2217 Mode, if the Ethernet data has many FF characters, some data may be lost while passing data to the serial side.
- Modified parsing data mechanism to fix import file failure.
- Unable to see the baud rate through a Telnet console on the "View settings" side.
- System reboots when receiving IGMP packets.
- The trap settings for port auto warning in the configuration file will be set to email settings after import.
- The destination and local port settings of TCP client mode would not be set to the correct values after setting the values from the web page.
- Web Console cannot display web pages when refreshing or switching web pages frequently using IE8.
