

REACH Declaration

The REACH Regulation (EC) No 1907/2006 governs the production, sale, and use of chemical substances in the European Union. Moxa is committed to working with our customers and supply chain to implement applicable REACH requirements, as they continue to evolve, to ensure continuous compliance.

The finished products we supply to our customers are not chemicals. Furthermore, under normal and reasonably foreseeable conditions of use, no substances are intended to be released from our finished products. Therefore, we are generally not subjected to mandatory registration.

Annex XVII of the REACH regulation contains the list of restrictions of certain hazardous substances, mixtures, and articles for their marketing and use in the European market. We declare that our products comply with these restrictions.

The Candidate List of Substances of Very High Concern (SVHC) is regularly updated by the European Chemicals Agency (ECHA). Suppliers are required to communicate down the supply chain on the presence of the Substances of Very High Concern (SVHC) in a concentration above 0.1% w/w.

The latest Candidate List of SVHC (240) can be found at : <https://echa.europa.eu/candidate-list-table>

According to the information gathered from our supply chain, our products may contain some components with concentration above 0.1% w/w of SVHC. Please be aware that the concentration threshold is applicable at the component level (e.g., diodes, resistors.) and not at the finished product level. The SVHC information is listed below.

All enclosed information has been provided to the best of our knowledge and belief under actual circumstances. Please contact Moxa Technical Support team if you need further information:
